PREAMBLE

For the upcoming Beach Soccer Season 2014, BSWW has established a World Ranking taking into account all the panorama of Beach Soccer events and competitions.

The basis of the BSWW World Ranking takes into consideration many aspects and factors observed by the FIFA/Coca-Cola Men’s World Ranking.

The weighting of the **BSWW World Ranking** follows a points-per-event system, where the position occupied in the standings of every event awards a determined amount of points to the given national team.

There are 6 (six) types of categorized events, ordered from highest to lowest in points:

1. FIFA Beach Soccer World Cup
2. FBSWC – Confederation Qualifier
3. Continental Beach Soccer League
4. Continental Beach Soccer Cups & Games
5. BSWW Tours: BSWW Tour (Category 1)
BSWW Tour (Category 2)
6. Friendly Matches

The following information explains and develops the criteria and point weight given to each of the mentioned categories.

1. ASSESSMENT PERIODS

▪ **2009-2013:**

The starting point for the Overall World Ranking takes into consideration the last 5 (five) years (2009-2013) in order to include the results of the last 3 (three) FIFA Beach Soccer World Cups:

- FIFA Beach Soccer World Cup Tahiti 2013
- FIFA Beach Soccer World Cup Ravenna/Italy 2011
- FIFA Beach Soccer World Cup Dubai 2009

YEAR	VALUE
2013	100%
2012	80%
2011	60%
2010	40%
2009	20%

The purpose of including three FBSWCs is to provide the Over All World Ranking (2009-2013) with an extensive results record and a solid criteria.

▪ **2011-2014:**

Starting from 2014, the principle of temporality applied to the updates of the ranking will change, and it will consider **4 (four) years (2011-2014)** and the last 2 (two) FIFA Beach Soccer World Cups, in order to draw a more updated picture of the beach soccer standings, one that reflects a clearer reality of the sport.

YEAR	VALUE
2014	100%
2013	75%
2012	50%
2011	25%

The period assessed meets a gradual decrease of the points weighting. Thus, the value of each year is 25% lower than the previous:

The ranking will be updated and published monthly.

2. WEIGHTING FACTOR - CONFEDERATION QUALIFIERS

The weighting factor for the Confederations Qualifier is determined on the basis of the last 3 (three) FIFA Beach Soccer World Cup final competitions. The following calculation steps, which are described in the table below, apply:

- Interconfederation¹ Matches at the FIFA Beach Soccer World Cups Final Competition
- Win = 1 point // Win at AET or PSO = 0,5
- Average per Game: WINS/TOTAL GAMES
- Average per Game during the last 3 FIFA Beach Soccer World Cups Competitions:

$$\text{Av. 2009-13} = (\text{Av.2009} + \text{Av.2011} + \text{Av.2013}) / 3$$
- The confederation weighting value ("Weight") is calculated in relation to the BEST confederation weighting value.

$$\text{Weight} = \sqrt{(\text{Av.2009-13x} / \text{BEST Av.2009-13})}$$
- If WEIGHT \leq 0,85, the weighting value assigned will be = 0,85

3. POINTS DISTRIBUTION CRITERIA 2014
